

Research Assistant I

A Research Assistant position is available to provide technical support towards agricultural greenhouse gas (GHG) reduction activities.

Candidates must be knowledgeable in aspects of agriculture and the environment. Knowledge of greenhouse gas issues a plus. Candidates must be proficient in the use of Excel and Word. Duties include supporting GHG protocols, algorithms, documentation and participation in science and technology activities. The individual will work in a multi-disciplinary team of scientists and engineers. Excellent written and verbal communication skills, people skills, organizational and record keeping skills essential.

The ideal candidate must possess a B.S. in an agricultural/environmental related field and 1+ years of experience. United States citizenship or existing lawful authorization to work in the United States is required for eligibility. Salary is commensurate with qualifications and experience.

Applicants should submit a letter of application (including a description of their expertise and experience), resume, and a list of five references to:

AgCert Services (USA) Inc.,
Science and Technology Dept.
1901 S. Harbor City Blvd., Suite 400
Melbourne, Florida 32901, USA.

Or email: hr-jobs@agcert.com

Applications will be considered only when all materials have been received. Review of applications will begin on August 15, 2006 and continue until the position is filled. Only qualified candidates will be contacted. AgCert Services (USA) Inc. is an equal opportunity employer.
