Assistant Professor - Environmental Engineering

Full-time position beginning in August 2010 requiring a doctorate in civil engineering, or a related engineering field, with a specialty/concentration in the area of environmental engineering. Excellent English communication skills and a commitment to teaching are necessary. Individuals with actual environmental engineering experience are especially encouraged to apply. Professional Registration (PE) is an asset. The position is at the assistant professor level, though exceptionally well qualified applicants may be considered for associate professor. The position will involve teaching environmental engineering and engineering mechanics courses at the undergraduate level, and environmental engineering classes at the master’s degree level. Review and evaluation of candidates will begin immediately. Applications will be accepted until the position is filled.

Trine University (formerly Tri-State University) is an independent, small, private institution located in the beautiful lake resort region of northeastern Indiana. The civil engineering program was founded in 1902, and has been continuously ABET accredited since 1970. The mission of the University is to provide productive, work-ready graduates to industry. Teaching is the first priority; however, faculty members are expected to develop and maintain appropriate contacts with industry.

Please send a letter of application, resume/vita, and list of three references to: Dr. Timothy Tyler, Dresser Chair, Reiners Dept. of Civil and Environmental Engineering, Trine University, 1 University Avenue, Angola, IN 46703-0307, tylert@trine.edu. Trine University is an Affirmative Action/Equal Opportunity employer.
