

Internship Program

- ❖ Our internship program enables students to gain valuable civil and environmental engineering work experience during their studies at the University of Delaware.
- ❖ We help students find internships that allow them to work on real-life engineering projects for private consulting firms as well as state, county, and city agencies.
- ❖ Students also have the option of becoming undergraduate research assistants, working closely with professors on their research projects.
- ❖ The pay is excellent.
- ❖ Student interns do not lose any time in terms of their academic programs, as they work full-time during summer and winter breaks and part-time during the fall and spring semesters.
- ❖ Internship programs can begin as early as the end of the freshman year.
- ❖ We have close to a 100 percent success rate on placement in our internship program.

- ❖ Our students have participated in internships with companies, government agencies, and academic institutions in states including Delaware, Maryland, Pennsylvania, New Jersey, New York, and Wisconsin. For a partial list of participating organizations, see the reverse side of this sheet.
