

Delaware Center for Transportation (DCT)

- ❖ DCT serves as the research and educational arm of the Delaware Department of Transportation (DelDOT).
- ❖ DCT initiatives include
 - **Research**—Selecting, conducting, and disseminating multidisciplinary research.
 - **Education**—Semester-long courses, short courses, workshops, seminars, and conferences for the university community, DelDOT, other DOTs, government agencies, and private organizations dealing with transportation issues.
 - **Technology Transfer**—Organization of annual workshops for transportation providers, technical assistance with transportation issues, and distribution of research and other reports from universities and government agencies.
 - **Distinguished Guest Speaker Series**—Guest speakers from around the world who are invited to visit the Center and present talks about important transportation issues.
 - **Technical Assistance**—Short-term projects for DelDOT and other organizations, including literature searches and hands-on training.
 - **Industrial Collaboration/Private Partnership**—Members of private companies and consulting firms who join the Center and become actively involved in decision making processes.
 - **Global Research**—Partnership with top-quality worldwide transportation education and research institutions, including the exchange of ideas, scholars, and research findings and the conduct of joint research projects, conferences, seminars, and workshops.
- ❖ These initiatives are integrated with the undergraduate and graduate education programs of the Department to enhance the learning environment for our students.
